

IN THE SPECIFICATION:

Page 3, please insert the following paragraph as amended at lines 6-16:

According to the invention there is provided a gas turbine engine comprising a core engine having a first fluid systems system and a fan case region (~~zone 4~~) having a second fluid systems system ~~[[,]]~~ wherein both the fluid systems consist of one or more of oil, gas or fuel pipes and are connected via pipes and harnesses, the pipes and harnesses are releasable at a disconnect panel, characterised in that the disconnect panel comprises at least two angled portions for routing the pipes and harnesses therethrough, the at least two angled portions providing at least two surfaces for substantially perpendicular intersection with the pipes and harnesses.
